

ANNOUNCEMENT

September 18, 2023

The Fund offers online safety training courses which members' employees can access from a personal computer, tablet, or phone. Topics include general safety training courses, driver training, and human resource courses. Users can track their own progress through these highly interactive courses as well as print certificates of completion once they have passed a simple test.

Online training is intended to supplement the other courses offered such as leadership training, safety officer training, van driver training, defensive driving, etc.

View the list of Online Courses here: [2023 Course Catalog](#)

Each user will need to request login credentials. Employees can then enroll in individual courses and receive a Certificate of Course Completion after passing a short quiz.

To request login credentials, please email kathy.hulse@sedgwick.com.

A User Guide with detailed instructions is available on the Fund website at this link:
