**Where do I get treatment?**

Fund members' injured employees are required to seek medical treatment from the Alliance's provider list of treating physicians. However, in case of an emergency, injured workers can go to the nearest emergency room; emergency care does not need to be approved in advance. Emergency care is covered under workers' compensation.

**What about injuries that occur after hours or holidays?**

The steps are the same for getting care after hours or holidays. If pain escalates through the night or over the weekend and you feel you need immediate care, go to the emergency room for medical attention and care. Certainly, you should seek immediate medical attention for any potentially life-threatening injury or illness.

**Where can I find a print friendly version of this information to give to the injured worker?**
